

## MOBILE BAR FOR OUTDOOR AND EVENT CATERING

10 MODELS FOR 1 OR 2 KEGS | INTEGRATED, COMBINED INTERIOR- AND  
CONTINUOUS-FLOW COOLING SYSTEM | WIDE RANGE OF EXTRAS

# MOBILE BAR – DISPENSING CAPACITY UP TO 70 l/h

## PLEASURE FROM THE WORD GO

K. & M. Holland Mobile Bars are the ideal partner for your outdoor and event catering. The integrated, combined interior- and continuous-flow cooling system enables immediate tapping and simultaneous cooling of 1 or 2 beer kegs. Due to the high dispensing capacity of up to 70 l/h (model-specific) the Mobile Bars are ideally suited for serving at exhibitions, in conference rooms and for promotional campaigns.

The various models and features enable the construction of a complete service station, which can be easily placed directly where it's needed thanks to 4, 6 or 8 swivel castors.

## THE PERFECT ADVERTISING MEDIUM

In addition, the K. & M. Holland Mobile Bars offer an ideal advertising space. Your advertising message can be perfectly displayed on the large front surface as well as on the two side panels. Whether in the catering area of large hotels or at the bar at trade fairs or club and company parties – your company is the focus of every event!

We're proud that numerous renowned breweries and catering companies have benefited from K. & M. Holland Mobile Bars and use them successfully at their events!

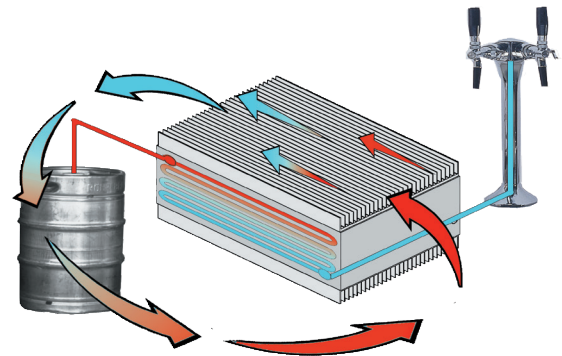

## ENERGY-EFFICIENT

The compact cooling body is seamlessly foamed under high pressure and finished without thermal bridges. The 60 mm (Mobile Bars) or 45 mm (Beer Bar) thick insulation keeps the cold in the cabinet interior longer. This is environmentally friendly, very efficient in terms of refrigeration technology and saves you energy and therefore electricity costs.

## COOLING BLOCK | 2 tapping lines

Thanks to the integrated, powerful, combined interior- and continuous-flow cooling system, a dispensing capacity of up to 70 l/h can be achieved immediately after tapping a warm keg. During the dispensing process, the cooling power is primarily used in the combination block to cool the beer. The temperature in the keg compartment is approx. 5 °C higher than the set temperature at the continuous cooler.

## READY TO USE

The Mobile Bars are also available as ready-to-use dispensing system. They have been tested by the Doemens Institute and provided with an SK number. The beer system is mounted ready for use and all fittings and hoses are installed. This saves you having to have the dispensing system approved by an expert, which is necessary when the Mobile Bar is relocated.

## PERFECT FINISHING

The Mobile Bar is clad in stainless steel with anti-fingerprint coating as standard. Alternate panelling is also available as an option, which can be individually designed or printed.

The stainless steel countertop has a rolled edge and a deep-drawn integrated drip tray with drain grid, the larger models are equipped with a sink. The big volume, easy-to-change (even without tools) hollow-chamber plug-in sealing on the doors and drawers guarantees hygienic handling. All standard 10 kg CO<sub>2</sub> bottles fit in the extra-large installation compartment with mains switch.

## EQUIPMENT

- Equipped for 1 or 2 kegs Ø 425 mm (50 l) in tapping mode
- Euro-Liter drawer (model-specific), e.g. for: 40 bottles of 0,5 l above | 28 bottles of 0,75/1,0 l below (depending on the height and diameter of the bottles)
- Powerful combined interior- and continuous-flow cooling system
- 2 tapping lines, flow-cooled
- Evaporator in addition to the cooling block, demand-controlled (model-specific)
- Countertop in stainless steel, with rolled edge and deep-drawn integrated drip tray with drain grid, drilled hole for beer tap Ø 50 mm
- Door and drawer fronts in stainless steel with anti-fingerprint coating
- Panelling in stainless steel with anti-fingerprint coating or with rails for the installation of advertising panels
- Big volume, easy-to-change door/drawer plug-in sealing
- Energy-saving 60 mm insulation, the whole body is foamed in one piece to exclude thermal bridges
- Bottom in sheet steel, specially coated in grey (N2PVA burlled), incl. keg retaining rail
- Robust frame with swivel castors
- Ready-to-use Mobile Bars with following additional features:
  - SK acceptance is certed | swan neck tower with 1 or 2 tapping lines | key for CO<sub>2</sub> bottles | CO<sub>2</sub> pressure regulator and gauge
- At extra charge with waste container (24 l) instead of revolving door under the sink (model-specific) | quick coupling for watter supply and waste water (Ø 1/2") | bar board | rinse bath for glasses and tumblers

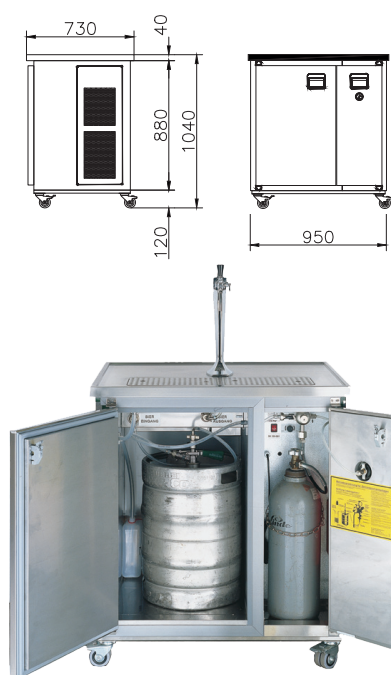

## Beer Bar BB900

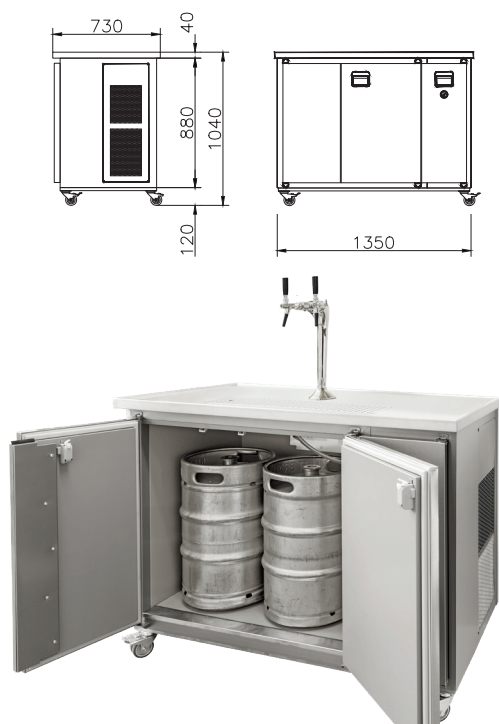

- for 1 keg Ø 425 mm (50 l) in tapping mode
- dispensing capacity 35 l/h
- width 900 mm x depth 630 mm x height 1014 mm

## Mobile Bar MT1 / MT1S

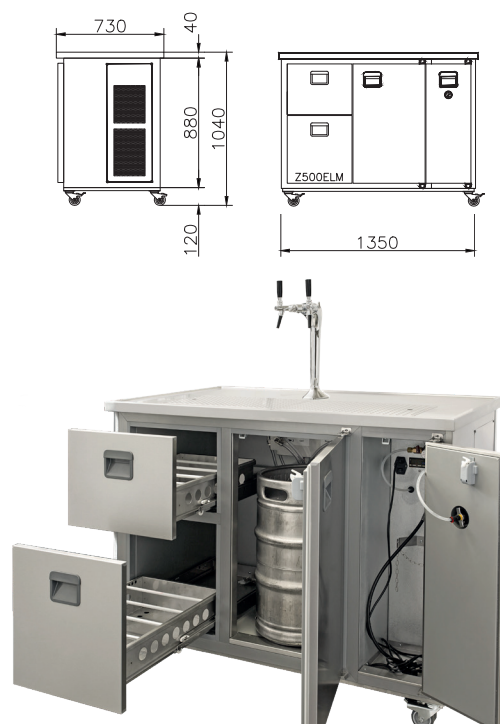

- for 1 keg Ø 425 mm (50 l) in tapping mode
- dispensing capacity 60 l/h
- width 950 mm x depth 730 mm x height 1040 mm

## Mobile Bar MT2 / MT2S

- for 2 kegs Ø 425 mm (50 l) in tapping mode
- dispensing capacity 70 l/h
- width 1350 mm x depth 730 mm x height 1040 mm

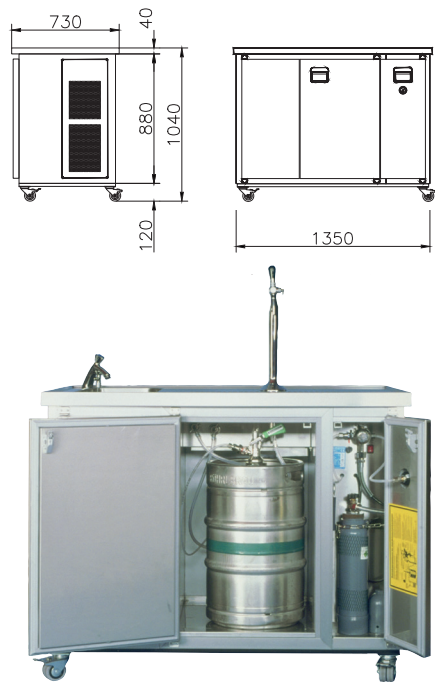

## Mobile Bar MT2Z / MT2SZ

- for 1 keg Ø 425 mm (50 l) + Euro-Liter drawer
- dispensing capacity 60 l/h
- width 1350 mm x depth 730 mm x height 1040 mm

## Mobile Bar MT3 / MT3S

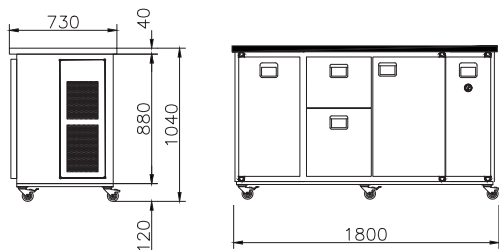

- for 1 keg Ø 425 mm (50 l) + revolving door, sink
- dispensing capacity 60 l/h
- width 1350 mm x depth 730 mm x height 1040 mm

## Mobile Bar MT4 / MT4S

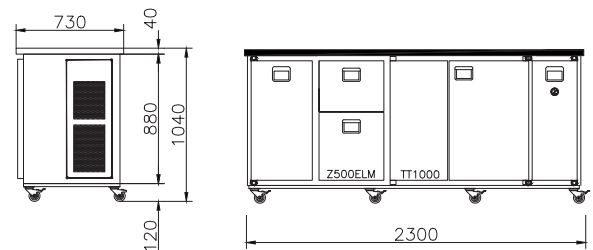

- for 2 kegs Ø 425 mm (50 l) + revolving door, sink
- dispensing capacity 70 l/h
- width 1800 mm x depth 730 mm x height 1040 mm

## Mobile Bar MT4Z / MT4SZ

- for 1 keg Ø 425 mm (50 l) + Euro-Liter drawer, revolving door, sink
- dispensing capacity 60 l/h
- width 1800 mm x depth 730 mm x height 1040 mm

## Mobile Bar MT5Z / MT5SZ

- for 2 kegs Ø 425 mm (50 l) + Euro-Liter drawer, revolving door, sink
- dispensing capacity 70 l/h
- width 2300 mm x depth 730 mm x height 1040 mm
